

BK Dynasty Series 900 Ultra Handheld DR

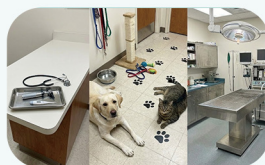

Ultra-Portable at Just 3.5 kg

Built-in high-capacity lithium battery with true wireless connectivity delivers flexible imaging across indoor, field and house-call scenarios.

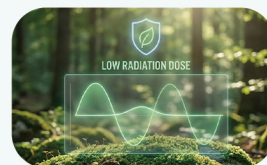

3X High Output Power for Large Animal Imaging

Superior X-ray penetration delivers sharp, high-resolution images, supporting imaging for animals of all sizes - with reliable performance for animals up to 30 kg.

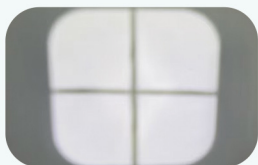

Multi-scenario use

shoot freely on desktop, floor and operating room

Low radiation dose

Intelligent part selection and precise exposure setting, one-click for clear images, easy operation
Radiation dose is about 1/10 of conventional DR

Rectangular imaging cross positioning

Clearer imaging, more accurate positioning, higher professionalism

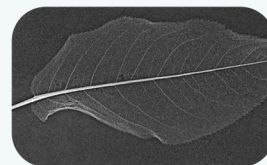

Brand-new operation interface

90 kV / 10 mA Power. 2-Second Speed.
Versatile imaging for every anatomical region, every species.

Fully upgraded flat panel detector

More compact, more convenient to move

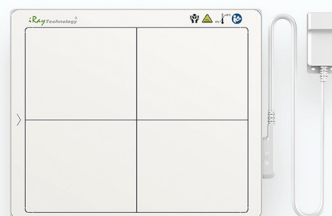

Comprehensively improved spatial resolution

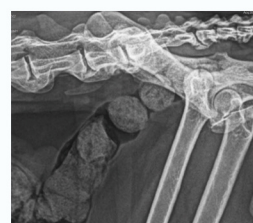

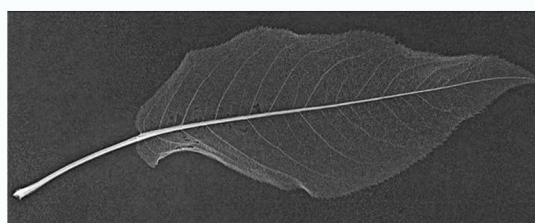

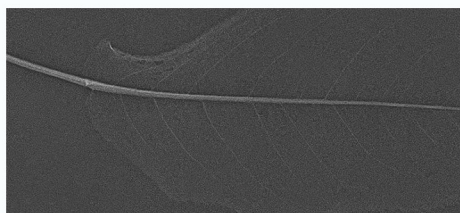

Clearer tiny lesions

WHAT ARE THE ADVANTAGES OF ULTRA?

-Lighter and more compact flat panel detector

COMPREHENSIVELY IMPROVED SPATIAL RESOLUTION

OUR SERVICES

We provide:

- Reliable, durable equipment
- Professional training (hands-on operation + clinical application)
- Difficult case support (remote consultation + veterinary AI assistance)
- Clinic operation guidance (department setup & workflow optimization best practices)
