

PORTABLE IMAGING SYSTEM

Easy to move and easy to operate

Easy to Move, Simple to Operate

1. Multi-scenario application. Images can be captured freely on the desktop, floor and in the operating room.
2. High imaging quality. With large-format imaging, it presents clear soft tissue and easily performs imaging for medium and large animal bones.
3. Fast imaging speed. One-click exposure and imaging is completed in 3 seconds.
4. Optional wireless flat panel detector.
5. Optional UPS wireless mobile power supply
6. Lower radiation and safe operation

Veterianry Portable DR Configuration					
No.	Component Name		Main Performance Parameters		QTY
1	X-ray Tube Assembly	X-ray Generator (with Exposure Hand Switch)	Power	5kW	1
			kV Range	40-125kV	
			mA Range	10-100mA	
			mAs Range	0.1-200 mAs	
			Exposure Time	1-4000ms	
			Power Input	AC220V	
	X-ray Tube		Focal Spot	0.6/1.8mm	
			Maximum Power	5kW	
			Anode Type	Stationary	
Heat Capacity			40KHU		
2	Collimator		Field of View	Max 43x43cm	1
3	Flat Panel Detector (Including Data Cable & Power Control Box)		Model	Venu1717XV	1
			Pixel Size	139µm	
			Pixel Matrix	2912×2912	
			Weight	≥4.0Kg	
4	Mobile Trolley		Lifting Mode	Manual	1
5	Veterinary-specific Image Acquisition & Processing Software		Conventional Processing Toolkit(Cropping, zooming, magnifier, rotation, flip, brightness & contrast adjustment, length & angle calipers, text annotation, graphic annotation, quick search system, JPG/BMP/DICOM image export, data backup & import, etc.)		1
6	Acquisition Workstation (Laptop)		Windows 10, 16G RAM, 1T SSD		1
